

SPAN: 03June21 Stage 2 Run-in/Validation MRI listings

From: **Karisma A Nagarkatti** | nagarkat@usc.edu

Friday, Jun 4, 11:37 AM

To: **Patrick Lyden** | plyden@usc.edu, **Jessica Lamb** | lambj@usc.edu

Cc: **Ryan Cabeen** | Ryan.Cabeen@loni.usc.edu

Hi Ryan,

Please find attached the excel document with the MRI's uploaded in the Run-in. I consolidated the notes being sent via email regarding model type, occlusion duration, etc. If you have any questions about particular cases I can query the sites for you.

Thanks for your help,
Karisma

Karisma,

Please make sure that Ryan has a full list of ALL MRi that have been uploaded during the 'run-in' phase.

Ryan,

I am really curious to learn your thoughts on the rat MRI scans, and whether the protocols are working. Ditto for aging mice.

Thanks,

P

I have uploaded one Day 2 SHR Rat MRI data set and two baseline SHR Rat data sets from scans done Thursday June 3 using the "classic" IDA uploader. This makes a total of 2 baseline and 2 Day 2 SHR scans uploaded.

Animal ID: IR1002

Scan Date: 2021-Jun-03

Model: SHR

Time point: Day 2

Occlusion time: 60 minutes

Animal ID: IR2001
Scan Date: 2021-Jun-03
Model: SHR
Time point: Baseline

Animal ID: IR2002
Scan Date: 2021-Jun-03
Model: SHR
Time point: Baseline

I have uploaded one Day 2 SHR Rat MRI data set from a scan done today using the "classic" IDA uploader.

Animal ID: IR1001
Scan Date: 2021-May-27
Model: SHR
Time point: Day 2
Occlusion time: 60 minutes

Surgery was done on another SHR rat with 90 minutes occlusion, but it died before the Day 2 scan. We have additional SHR scans planned for next week.

Let me know if you need anything else or if the naming convention needs to change. I am planning to use conventions IRXXXX (Iowa rat), IOXXXX (Iowa obese), and IVXXXX (Iowa validation) for future uploads.
