Dear SPANners,

Attached please find the weekly report – we are proceeding apace with enrollments. On the other hand, data entry is lagging, as are the behavioral ratings. As we near our first interim analysis, please dedicate time to catching up on data entry, video ratings, and data quality. Remember, quality cannot be added in at the end of the trial – quality must be built in from day 1.

Many thanks for all your superb efforts during these troubled times. As our society begins to again appreciate facts and science, projects like SPAN take on even greater significance.

Best regards,

PL
