Due to an operator error during the scan (yes, I am the operator), there is one series missing (diffusion $b = 0$) from the scans for KX0025 Day 2 that I uploaded today. I rescanned the other b values for better quality, but in the process, the $b = 0$ scan was skipped.

I haven't been sending Template documents for quite a while since they had the same information every time, but I can catch up and resume if desired to include documenting issues like this.

Thanks,
