Dear Spanners,

Taking into account all your feedback, input from the External Advisory Board, extensive unblinded analyses that will be archived for your later review, and concurrence from NINDS, we will begin Stage 2 on time and including all treatments carried forward from Stage 1. All sites will do all treatments in Stage 2, including RIC. For inventory control and re-supply purposes, we are forecasting the same n=8 MCAo per week that you all achieved in Stage 1.

The CC will be forwarding shortly more detailed guidance regarding Stage 2 protocols and SOPs. Importantly, there will be more rigorous training and certification than in Stage 1, to avoid some of the confounds we uncovered. However, given all the stellar feasibility results, we will not be changing too much.

Meanwhile, attached please find some documentation of the heroic efforts going on right now to get ready on time. We feel like we are planning the storming of Normandy, but we will be ready.

Be well,

PL
