Hi Ryan,

I wanted to follow up. Thanks again for your thoughtful presentation. You had noted that there were some cases where images were repeated or missing. Are you able to send me which Animal Records are missing these scans? I can follow up with them so that they reupload the correct scans or missing scans.

thanks for your help,  
Karisma

Hi Karisma,

Yes, glad to share this, here is a summary I made:

cases/process/early/KW9346: no ADC  
cases/process/early/QC3037: no ADC  
cases/process/late/PH1100: no ADC  
cases/process/late/PH1500: no ADC  
cases/process/late/VH2011: multiple ADC scans, probably manually fixable  
cases/process/early/KX0289: no T2  
cases/process/early/QC3140: no T2  
cases/process/late/VH2261: no T2  
cases/process/early/KX0299: no RARE, but found another upload with it and merged it  
cases/process/early/AM3694: failed nifti conversion, "Error: Converted 204 of 207 files"  
cases/process/late/KW9444: failed nifti conversion, "Error: Converted 120 of 209 files"

I've also attached the latest table of imaging metrics, as well as a pdf report summarizing things. Please let me know if you're wondering about anything in there, since there might be some labels that are somewhat obscurely coded.

Cheers,

Ryan
