Thanks for the update Karisma. Typically Ryan and I go over the issues first, for the sake of efficiency. Pat of course is more than welcome to join us anytime. Then we arrange a larger group meeting to present the findings, outstanding issues, discuss solutions, have a recommendation for the SC to discuss before settling on a protocol. It would indeed be good to put something on the calendar though, especially if Pat will join. Please send me and Ryan his schedule and we will figure out something. By the way, I believe MGH timeline for obese mice is later than UT and UI. So we will not have the benefit of this data if we dive in too soon.

Hi Dr. Ayata,

UTH and U Iowa sites have confirmed that their obese mice will be ready for practice surgeries (after 10 weeks of the high fat diet) in the last week of June 6/24-6/28. Should I start querying the MRI group for their availability to meet or would you prefer to schedule a smaller group (i.e. Ryan, Dr. Lyden and you)? I have attached a consolidated questionnaire where sites provided some feedback from their experience using the adjusted protocol in Stage 2.

Dr. Lyden received Stage 1 banked tissue from Augusta on Friday of last week and we are expecting U Iowa's shipment tomorrow.

Thank you for your help,

Karisma

Hi Dr. Ayata,

These are the end of Stage 2 Run-in timelines that were provided by each site a few weeks ago. I will follow up with each site today to get specific dates for sites that gave a generality like "end of June". Regarding TTC/MRI Validation. We received TTC images from JH. U Iowa is the last site they indicated that they would complete their MRI/TTC this week.

Thank you,

Karisma

- a. >> AG (aged, SHR) will finish end of May. Aged performed end of April
- b. >> IW (OB, SHR) SHR by end of May. OB surgery Jun 24th
- c. >> JH (aged, SHR) aged 28d behavior planned 6/8 SHR 28d behavior 6/30
- d. >> MG (OB, SHR) planned SHR 6/2-6/14. OB model 6/23-7/12
- e. >> UT (OB, aged) will perform surgery on aged mice as they become available. OB mice will be ready the end of June
- f. >> YL (OB, aged) OB will be ready end of June

Karisma,

1) Do we have a timeline table or summary to indicate where each site is regarding Stage 2 pilots?

I am trying to arrange for the MRI analysis and group meeting to establish the protocol.

2) Do we have a timeline for the missing data for Stage 1 validation? We have to get on with it if the remaining site(s) will be even more late.

Thanks for the help!
