Hi Ryan,

I am sorry to be emailing on top of your busy workload. But we just had a meeting with the Stats team regarding the Quality control charts that Dr. Lyden would like to distribute to sites during Stage 2. We propose the following:

- Start 7/14, request every 2 weeks (Frequency of request may change to weekly after mid-August surgeries)
- Karisma (CC) to request MRI data from Ryan (LONI) on Wednesdays every 2 weeks
- Marcio (Stats) to use the MRI data to make the Control Charts on Thursdays every 2 weeks
- CC to send sites feedback on Fridays every 2 weeks

Let me know your thought and if this will be possible,

Karisma

Hi Karisma,

I think this will be mostly doable, but I'm not sure if we can start quite that soon. I'm still working on updating the pipeline for rats and also incorporating changes based on feedback from Dr Ayata, which will likely take more than a week. The mice should make it through alright though, as before. I think weekly updates might be challenging for an extended period of time, though probably doable for a short initial period.

One more thing, I haven't seen any updates on the IDA to differentiate rats and mice. I thought this was going to be added for stage two, yes? This is important for the pipeline, since they need to be handled separately.
