Dear All,

Next Tuesday we will be reviewing the stage 2 pilot MRIs. Our prelim review with Ryan did not reveal any issues with the following plan:

- 1) Aged and obese mice: original 19.2 mm in plane x 15 mm in slice direction field of view; 0.15 mm in slice resolution, 0.5 mm slice thickness
- 2) SHR: 25.6 mm in-plane x 24 mm in slice direction field of view; 0.15 mm in slice resolution, 0.8 mm slice thickness
- 3) All: Matrix density 128 x 128 x 30 slices, use fat suppression. Unless there is strong appeal, we will drop RARE. Ryan will show some examples and we can ratify or modify for stage 2 after discussion.

Thanks,

C
