Dear SPAN Imaging Group,

LONI is rolling out a new IDA uploader which will differ slightly from the software used to upload MRI images in Stage 1. Before we consider switching to IDA Uploader 2.0, we want to understand how the following changes will affect your workflow. Please see the differences described by LONI below and respond back with your questions or concerns.

IDA Uploader 2.0

1. MRI uploaded in IDA2 and then downloaded will have a different directory path and file naming convention. Ryan and says as long as he can parse the **subject ID from the file name**, he does not foresee any problems.
2. MRI uploaded in IDA2 can **only be downloaded in DICOM - no file format translations are supported**. Again, Ryan downloads MRI in DICOM so no impact on him. Not sure if others were relying in IDA1 built-in file format translation to NIfTI/Analyze format.

Thanks,
Karisma
