Hi Ryan,

The Yale site notified me that on their naming convention they made an error for KW9442, they labeled the Day 2 MRI file uploaded 1/21/21:

I'm not sure this affects your analysis as I'm sure you use the IDs and Visit codes but wanted to let you know just in case.

Thanks,
Karisma

Thanks so much! I'm very happy!

I would like to report an error in the data upload. The file for the MRI day 2 for the animal KW9442 was uploaded as: 20210121_112422_KW9422_Ya_d2_stage1_1_1

I was checking the day 28 lesions and saw that it was missing. At day 28 the name is correct.

Thanks,

Ligia
