Hi Ryan,

Over the past few days, I have been double checking MRI files that were uploaded incorrectly into IDA. I have changed visit codes from D28 to D29 for a few files, deleted animal records that were incorrectly entered into IDA, and asked sites to reupload files that were incorrect. I am still waiting on UTH to fix some of these files but have created the attached excel spreadsheet to give you an idea of recent reuploads/deletions/visit code changes that have been made for 5 of the sites and will be made for UTH. Let me know if you have any questions.

Thanks,
Karisma
