Dear Drs. Ayata and Cabeen,

U Iowa submitted their TTC results for the MRI pipeline validation yesterday. As of yesterday, we have all the TTC images/ MRI scans from all 5 sites. I have consolidated all the TTC images we have received in the google link below. All 5 sites used the MRI protocol where we ask each site to complete TTC images after the D2 scan. I have attached that protocol here.

https://drive.google.com/drive/folders/1CdTb9FsfQJfGVkgClzaZHIQ25Xwl7NPV?usp=sharing

Please let me know if there is further information that is required to validate the pipeline. I am also attaching an excel document with 11June21 updates for MRI scans that have been uploaded in the Stage 2 pilot and MRI validation. Thank you again for your efforts and again please let me know how else I can help get you the information you need.

Thanks,

Karisma

Attached please find TTC images for mouse ID IV1001, IV1002, IV1003, and IV1004.

Dan has uploaded four Day 2 validation MRI data sets using the IDA 2.0 uploader. All scans used the original Stage 1 MRI protocol.

Thanks
Nirav
