Dear SPAN Investigators,

This email is to provide an update regarding IDA Uploads for the two experimental protocols (Stage 2 Run-in and MRI Pipeline Validation). LONI has created new visit codes for the two experimental procedures. The Animal ID naming conventions suggested to you in Friday's 4/23 email are not accepted by the IDA system. IDA has a set format for Animal IDs (2 Letters, 4 numbers: XX####). As in Stage 1, the animal IDs uploaded into IDA should not change across visits.

Sites will now have the option to **select 'Stage 2 Pilot' with the appropriate timepoint (BL,D2,D28, etc.)** when uploading scans or videos into IDA.
LONI will be creating a visit code: **'MRI validation D2'** for the TTC/Pipeline validation animals.

Re-attached are the revised Experimental protocols (sent in yesterday's Steering Minutes email) which include the updated IDA visit codes.

It is very important that you **email** us (spancc@usc.edu) with the relevant details (Animal ID, Scan date, Age of animal, Model) for every scan or video uploaded into IDA.

New IDA Visit Codes

For the **Run-in phase** select
'Stage 2 Pilot BL'
'Stage 2 Pilot D2'
'Stage 2 Pilot D7'
'Stage 2 Pilot D28'
'Stage 2 Pilot D29'

For the **MRI Pipeline Validation** select
'MRI Validation D2' <-*LONI is still building this Visit Code in IDA

Please let me know if you have any questions or would like further clarification.

Thank you,
Karisma
